

SCREW COMPRESSORS - Airmate Mercury

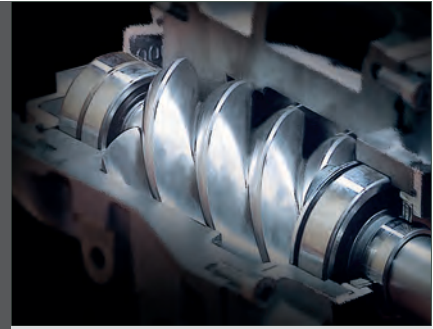

key features

Industrial SCREW Compressors with Integrated Dryers now available!

These 3 phase rotary screw compressors are designed for continuous use in demanding workshop and industrial environments. Optimising energy consumption, these brand new, Italian made models from SIP are super-efficient, powerful and reliable.

Why Choose an SIP Screw Compressor?

- **Efficient**
Over 95% of the air intake is delivered to the tank, meaning greater efficiency and lower energy consumption than piston compressors
- **100% Duty Cycle - Intensive and Continuous Running**
These models can be run for 24 hour usage without a drop in performance
- **Low Noise**
Quieter than piston compressors allowing installation closer to your workspace
- **Air dryer eliminates moisture from the air supply extending the life of air tools**
- **Save space with this all-in-one package for ultimate air efficiency**

Rotary Screw Technology - efficient, low noise and reliable

SILENCED INDUSTRIAL Compressors

key features

Presenting our range of fantastic silenced piston compressors, designed to give you powerful performance but with the fraction of the noise associated with standard piston compressors. These Italian made compressors are an excellent addition to any workshop where the installation requires close placement to the workspace.

- For large air volume requirements with the lowest possible noise levels.
- Extra quiet - *only 64dB(A)*
- Heavy duty 2 stage piston pump for optimum performance and reliability
